

	BRAJVIDHYA SERVICES PRIVATE LIMITED 404, Saguna Arcade, Scheme No. 54 Commercial, PU-4, Vijay Nagar, Indore, Madhya Pradesh – 452010, India
	Procedure- Audit Procedure

1. PURPOSE: To establish and define a systematic and documented process for auditing the client's management system against the applicable audit criteria, including relevant standards, certification requirements, and other specified requirements, in order to determine conformity and provide objective evidence for the certification decision.

2. SCOPE: This procedure applies to all QMS certification audit activities conducted by BVSPS including pre-audits, document reviews, initial certification audits (Stage 1 and Stage 2), surveillance audits, recertification audits, special surveillance audits, scope extension audits, short-notice audits, transfer audits, and any other audits conducted as part of the FSMS certification process.

3. REFERENCES:

ISO/IEC 17021-1 – Requirements for bodies providing audit and certification of management systems.

ISO 9001 – Quality management systems – Requirements.

ISO/IEC 17021-3 – Competence requirements for auditing and certification of quality management systems.

4. RESPONSIBILITY: The Auditor(s) shall ensure that all audit activities and processes are conducted in accordance with this procedure and the applicable audit criteria.

5. DESCRIPTION: The Auditor(s) shall prepare the **Audit Programme, Audit Assignment Letter, and Audit Plan** prior to commencement of the audit, in accordance with the applicable certification requirements, audit criteria, and this procedure. The Auditor(s) shall complete and sign all applicable records related to confidentiality, impartiality, and conflict of interest, as required by BVSPS and/or the certification scheme, prior to undertaking any audit activities.

5.1 Audit Procedure:

Opening Meeting:

- Upon arrival at the client's premises, the Lead Auditor shall conduct and chair the opening meeting with the client's designated representatives and relevant personnel. The Lead Auditor shall ensure that the audit objectives, scope, criteria, methodology, audit plan, reporting arrangements, and other relevant audit requirements are communicated and understood by the client.
- During the audit, the Audit Team shall systematically collect, document, and verify objective evidence to determine whether the client's management system has been effectively implemented and maintained and conforms to the applicable audit criteria.

Conducting the Audit:

- Conduct the audit in accordance with the approved Audit Plan.
- Evaluate the client's QMS against the applicable audit criteria.

Doc No- BVSPS-QP-18 Issue No-01 Revision No-00 Effective Date-02-06-2026 Page No- 1

Prepared By: Quality Manager	Approved By: Managing Director
Checked By: Technical Manager	Issue By: CB- Head Certification

- Use appropriate audit methods, including interviews, observation, examination of documented information, review of records, and sampling.
- **Maintain professional and impartial conduct throughout the audit.**

Collection and Verification of Objective Evidence:

- Collect sufficient and relevant objective evidence to support audit conclusions.
- Verify information obtained through interviews, records, observations, and other sources.
- Record sufficient details to demonstrate the basis for conformity or nonconformity.
- Identify the personnel interviewed and relevant processes/activities examined.
- Determine whether the QMS processes are implemented and effective.

Recording Nonconformities: Nonconformities identified during the audit shall be classified as either Major Nonconformity or Minor Nonconformity, based on the nature, extent, and impact of the identified failure to meet the applicable audit criteria.

Major Nonconformity: A Major Nonconformity shall be raised when there is a significant failure to fulfil a requirement of the applicable standard or certification criteria, or when the identified nonconformity adversely affects the capability of the management system to achieve its intended outcomes.

Minor Nonconformity

A Minor Nonconformity shall be raised when a requirement has not been fully met, but the identified failure does not significantly affect the capability of the management system to achieve its intended outcomes.

- Document each nonconformity clearly and objectively.
- Record sufficient objective evidence to substantiate the nonconformity.
- Discuss the identified nonconformities with the client during the audit and confirm understanding.

Opportunity for Improvement (OFI): is an observation identified by the Auditor where the client's existing process, practice, or method conforms to the applicable audit criteria and organizational requirements, but there is potential for improvement in its effectiveness, efficiency, consistency, or alignment with recognized good practices. An OFI may also identify an area where, if not addressed, there is a potential for a future nonconformity.

Areas of Concern – Stage 1:

Area of Concern identified during Stage 1 shall be documented where issues are identified that could be classified as a nonconformity during Stage 2. The Auditor shall communicate such concerns to the client and verify them during Stage 2.

	Procedure- Audit Procedure

Closing Meeting:

- Auditor(s) shall support the Lead Auditor in presenting relevant audit findings and providing clarification where required.
- Ensure that the client understands the reported nonconformities and applicable follow-up requirements.

Audit Reporting:

- Prepare assigned sections of the Audit Report and submit them to the CB. (BVSPL)
- Ensure that all reported findings are supported by objective evidence.
- The Lead Auditor shall review and finalize the Audit Report.

Corrective Action Review:

- Verify whether the submitted information adequately addresses the identified nonconformity.
- Where effectiveness verification is required, conduct or support the applicable follow-up audit activity.
- Record the results of the verification.

Audit Records: Complete and submit all required audit records, including:

- Audit Plan
- Audit Programme, where applicable;
- Audit Checklist
- Auditor Notes
- Audit Report
- Nonconformity Reports
- Objective Evidence;
- Corrective-Action Verification Records; and
- Confidentiality, impartiality and conflict-of-interest declarations. (before)
- Submit records to BVSPL within 1 Week.
- Client feedback

Timeline for Corrective Action: The client shall submit the proposed correction and corrective action plan within the timeframe specified by BVSPL. Corrective actions shall be implemented within the agreed timeframe and shall be subject to review and verification by the Auditor.

Major Nonconformity: Corrective action plan shall be submitted within 30 days and implementation shall be completed within 30 days, subject to BVSPL requirements.

Minor Nonconformity: Corrective action plan shall be submitted within **30 days** and implementation shall be completed within **30 days**, subject to verification of effectiveness.

Note: The Auditor shall review the proposed correction, root-cause analysis, and corrective action to determine whether they adequately address the nonconformity.

Initial audits Stage 1 and 2 / Surveillance Audit/ Recertification Audit

For an ISO 9001 QMS certification audit, the procedure can state the following in line with ISO/IEC 17021-

1 requirements:

Stage 1: The Auditor shall conduct Stage 1 to:

1. Review the client's QMS documented information.
2. Evaluate the client's site-specific conditions and determine readiness for Stage 2.
3. Review the client's scope of certification and applicable processes.
4. Obtain an understanding of the client's organization, processes, and operations
5. Review applicable statutory and regulatory requirements.
6. Review the allocation of resources for Stage 2 and agree the details of Stage 2 with the client.
7. Determine whether the client's internal audits and management reviews are being planned and performed and whether the level of implementation indicates readiness for Stage 2.
8. Identify areas of concern that could be classified as a nonconformity during Stage 2.

Note: The interval between Stage 1 and Stage 2 shall not exceed six months. Where a longer interval is required, Stage 1 shall be repeated before proceeding with Stage 2.

Stage 2: The Auditor shall conduct Stage 2 to: The Stage 2 audit shall be conducted to evaluate the implementation and effectiveness of the client's QMS against the applicable audit criteria, including ISO 9001 requirements, the defined certification scope, and applicable statutory, regulatory, and contractual requirements.

1. Conduct the audit in accordance with the approved Audit Plan.
2. Verify the effective implementation of the QMS through appropriate sampling and objective evidence.
3. Evaluate conformity with all applicable requirements of the audit criteria.
4. Assess the effectiveness of operational processes and controls.
5. Review relevant performance monitoring, measurement, analysis, and evaluation.
6. Evaluate internal audits and management reviews.
7. Verify the organization's ability to meet applicable statutory, regulatory, and contractual requirements.
8. Follow up on Areas of Concern identified during Stage 1.
9. Record and classify nonconformities based on objective evidence.
10. Prepare and submit the Stage 2 Audit Report and supporting records.

Note: The Auditor shall ensure that sufficient objective evidence is collected to support the audit conclusions and any recommendation relating to certification.

Surveillance Audit: Surveillance audits shall be conducted at planned intervals to verify that the certified client's QMS continues to conform to the applicable certification requirements and remains effectively implemented and maintained.

1. Conduct the audit in accordance with the approved Audit Plan.

2. Review significant changes to the organization, QMS, processes, products/services, and scope.
3. Verify the effectiveness of actions taken for previous nonconformities.
4. Review relevant complaints and appeals and actions taken.
5. Evaluate the effectiveness of the QMS in achieving its objectives and intended outcomes.
6. Review internal audits and management reviews.
7. Verify selected operational processes and applicable QMS requirements through sampling.
8. Verify continued fulfilment of applicable statutory, regulatory, and contractual requirements.
9. Verify the correct use of certification marks and references to certification, where applicable.
10. Record objective evidence and identify any Major or Minor Nonconformities.
11. Prepare and submit the Surveillance Audit Report and supporting audit records.

Note: Surveillance audits shall be conducted at least once in each calendar year, except in the year of recertification. The first surveillance audit after initial certification shall be conducted within 12 months of the Stage 2 audit completion date.

Recertification Audit: The recertification audit shall be conducted before the expiry of the existing certification to evaluate the continued conformity and effectiveness of the client's QMS and its continuing relevance and applicability to the defined certification scope.

1. Review the performance of the QMS throughout the previous certification cycle.
2. Review previous surveillance
3. Review significant changes to the organization, QMS, processes, products/services, and certification scope.
4. Evaluate the continued effectiveness of the QMS and its ability to achieve intended outcomes.
5. Review internal audits and management reviews.
6. Verify the effectiveness of corrective actions for previous nonconformities.
7. Evaluates relevant complaints, appeals, and actions taken.
8. Evaluate the effectiveness of the QMS considering changes in the organization and its context.
9. Verify the appropriate use of certification marks and references to certification, where applicable.
10. Collect sufficient objective evidence through appropriate sampling.
11. Prepare and submit the Recertification Audit Report and supporting records.

Note: The recertification audit shall be planned and conducted sufficiently in advance of the expiry of the certification to allow adequate time for correction and corrective action, review, and the certification decision to be completed before the existing certificate expires.

Important: Recertification is not simply a repeat of the previous surveillance audit. It shall provide an overall assessment of the **continued effectiveness of the QMS over the certification cycle** and consider the results of previous audits.
